## CR5000 Specifications

Electrical specifications are valid over a $-25^{\circ}$ to $+50^{\circ} \mathrm{C}$ range unless otherwise specified; testing over $-40^{\circ}$ to $+85^{\circ} \mathrm{C}$ available as an option, excludes batteries. Non-condensing environment required. Yearly calibrations are recommended to maintain electrical specifications.

## PROGRAM EXECUIION RATE

The CR5000 can measure one channel and store the result in $500 \mu \mathrm{~s}$; all $40 \mathrm{SE}^{*}$ channels can be measured in 8 ms ( 5 kHz aggregate rate).
